

Technical & Design Department

A unique opportunity has arisen to join an expanding company that specialises in manufacturing a range of innovative products for the construction, marine and film industries.

The technical & design department is seeking a lateral thinking individual to strengthen the team and to contribute to the company's exciting future. We need people who can help us in providing solutions to be-spoke design concepts and provide technical backup for all of our product range.

The position will involve a range of activities including:

- Producing designs and estimates for one off projects
- Preparing detailed information for in house production
- Interfacing with customers and project co ordination

Cordek is a unique company and therefore in house training will be given. However the following skills will be required:

- A working knowledge of the construction/ building industry
- A numerate background preferably with a further education qualification in an Engineering or Building discipline
- Computer literacy including Word, Excel and CAD skills.
- An ability to communicate verbally and in writing at all levels

Additionally the follow experience would be beneficial:

- 3D CAD
- Formwork design
- Site experience

If you wish to investigate Cordek and its range of products further, please refer to our web site www.cordek.com.

Position - Salary £24-32k + Benefits
Salary range depending upon experience
